Theories of Jurisdiction and Their Application in Extradition Law and Practice

M. Cherif Bassiouni

1

Recognizing that extradition is contingent upon subject matter jurisdiction of the courts of the state requesting one's extradition, the author discusses theories under which states assert such jurisdiction. Presented is an in depth analysis of the five jurisdictional theories recognized in international law, namely: (1) *Territorial*; (2) *Active Personality or Nationality*; (3) *Passive Personality*; (4) *Protective*; and (5) *Universality*.

Border Patrol Checkpoint Operation Under Warrants of Inspection: The Wake of *Almeida-Sanchez v. United States*

James E. Leahy

62

Since the United States Supreme Court rendered its decision in *Almeida-Sanchez v. United States*, fixed border patrol checkpoints have been operated under authority of temporary "probable cause" warrants issued by a "neutral and detached" Federal Magistrate. The author analyzes the constitutionality of this practice in view of recent decisions and concludes that the procedure is consistent with opinions expressed by a majority of Supreme Court Justices.

The World's Laws Concerning Voluntary Sterilization for Family Planning Purposes

Jan Stepan & Edmund H. Kellogg

72

This article presents a thorough examination of the different laws of the world which allow or deter voluntary sterilization. To encourage universal guarantees of the now internationally recognized human right of family planning, the authors propose domestic statutory provisions for implementation of voluntary sterilization.

I.C.J. Damages: Tort Remedy for Failure to Punish or Extradite International Terrorists
William R. Slomanson 121

In violation of multilateral agreements some states harbor international terrorists rather than punish or extradite them. In search of a United Nations solution to the problem, the author describes the infeasibility of an international criminal court. As an alternative he discusses the possibility of holding nations liable for damages in the International Court of Justice.

Micronesia and Free Association: Can Federalism Save Them?
John B. Metelski 162

In this article, the author discusses Micronesia's acquisition of a greater degree of self determination. Considering the choice which Micronesian leaders must make as to which form of government to implement, the author analyzes Federalism as a possible alternative. In presenting the considerations which militate for and against Federalism there, particular emphasis is placed upon geographic, economic, political, historical and sociological factors.
